THE COVER

The diesel-engine option in this truck pairs 440 lb.-ft. of torque with 30 mpg fuel economy. This mix of power and efficiency is driving many customers toward smaller diesel vehicles.

Big Protection for Smaller Diesel Vehicles

New AMSOIL 100% Synthetic Diesel Oil provides outstanding protection, performance and fuel economy for smaller American diesel pickups, vans, cars and SUVs.

The diesel market continues to grow and gain popularity. While diesel enthusiasts and professionals often rely on powerful turbodiesel engines in their vehicles, not everyone needs or wants a fully loaded, three-quarter-ton or larger pickup. But many still want the added power, torque and fuel economy of a diesel engine, and they're willing to pay more to get it.

Increased Demand

The market has seen increased demand for diesel engines in smaller, half-ton pickups and other passenger vehicles, including the Chevrolet* Silverado 1500,* Chevrolet Colorado,* GMC* Sierra 1500,* GMC Canyon* and Ford* F-150.* Diesel options are also popular in smaller passenger vehicles like the Chevrolet Cruze,* Chevrolet Equinox* and GMC Terrain.* An estimated 200,000 smaller diesel vehicles are currently operating in the U.S., a 58 percent increase over 2019, and those numbers are expected to continue rising.

Which Oil to Use?

AMSOIL Signature Series Max-Duty Synthetic Diesel Oil and Heavy-Duty Synthetic Diesel Oil provide premium protection for large turbodiesel engines calling for an API CK-4 (or prior) specification, but smaller diesel engines require diesel oils meeting different specifications. While we've recommended AMSOIL Synthetic European Motor Oil for many of these vehicles, and it provides outstanding protection, it is not specifically formulated or marketed for American diesel vehicles.

AMSOIL 100% Synthetic Diesel Oil

Available in 0W-20 and 5W-30 viscosities, new AMSOIL 100% Synthetic Diesel Oil (DP020, DP530) is engineered specifically for smaller American diesel vehicles and provides industry-leading protection and performance. In fact, **it delivers up to 6X better wear protection than required by a leading industry standard.¹**

- Outstanding protection during heavy use and abuse and in extreme temperatures
- Helps extend engine life and reduce maintenance costs and downtime
- Helps maintain power and fuel efficiency for superior engine performance
- Outstanding turbocharger and emissions-system protection
- Superior engine cleanliness
- Minimizes oil consumption
- Meets or exceeds the latest specifications for smaller diesel vehicles

Applications

Use in diesel pickups, vans, cars and SUVs that require any of the following specifications:

0W-20 (DP020): GM dexosD

5W-30 (DP530): GM dexosD, dexos2; Chrysler MS-11106; Ford WSS-M2C214-B1; ACEA C3

Not for use in applications that require an API CK-4 (or prior) specification.

Service Life

AMSOIL 100% Synthetic Diesel Oil is recommended for the drain intervals stated by the original equipment manufacturer (OEM). Refer to the owner's manual for the specific oil change interval. Intervals may be extended beyond the OEM-recommended interval with oil analysis.

Matt Erickson | DIRECTOR, TECHNICAL PRODUCT MANAGEMENT

Oil-life monitors keep improving, but they're not perfect.

What happens when your vehicle's oil-life monitor contradicts our oil-change recommendations?

Oil-life monitoring systems (OLMS) are standard on most vehicles today. Their prevalence the past several years has helped convince motorists to go longer between oil changes than the old 3,000-mile (4,800-km) standby, reducing waste oil and saving time and money. Today, it's common for an OLMS in a vehicle driven mostly under normal service to recommend an oil change after 10,000 miles (16,100 km) or more.

For all their benefits, these systems do have shortcomings. For starters, they sometimes provide service intervals that contradict the recommendations of some of our oils. Their biggest shortcoming, however, is what they *don't* do. To get the details, let's look at how an OLMS works.

Frankly, oil-life *monitor* is a poor description for these systems. A better name is oil-life *estimator*. They **do not monitor any direct physical or chemical property of oil**; they only accumulate data from the vehicle's computer and predict how your driving habits and operating conditions have affected the oil's viscosity, total base number (a measure of remaining detergency), oxidation level and other factors.

Since the OLMS can't measure these key properties like a chemist in a lab would measure them, how can it know when the oil has, for example, only 10 percent life remaining? It can't. The OLMS simply estimates oil life based on an algorithm.

While first-generation oil-life monitors were simple, mileage-based systems that prescribed fixed oil-change in-

tervals regardless of operating conditions, today's systems are far more sophisticated. They monitor several conditions known to reduce oil life, enter those values into an algorithm and return the oil-life percentage you see on your vehicle's display.

Towing, for example, can lead to increased engine rpm, which stresses the engine and the oil. If the vehicle's computer detects frequent high-rpm driving, the OLMS will shorten the oil-change interval. The same holds for extreme ambient heat, which can accelerate oxidation and chemical breakdown of the oil. Continually driving under heavy loads, like while towing, also shortens the drain interval, along with several other factors.

For example, Ford* says in a video on its website that drivers can expect its Intelligent Oil-Life Monitor* to recommend oil changes about every 7,500-10,000 miles (12,100-16,100 km). But, if you do a lot of trailer-towing or idling, expect the system to recommend oil changes every 5,000-7,500 miles (8,000-12,100 km). Driving in extreme temperatures or frequently towing near maximum capacity will lead to oil changes every 3,000-5,000 miles (4,800-8,000 km). Oil-life monitors from other automakers typically follow the same pattern.

But, what if I use AMSOIL Signature Series Synthetic Motor Oil, which is proven to neutralize acids, fight viscosity loss and resist volatility better than other oils, helping it last longer? How does the OLMS adjust its recommendations depending on oil quality? It can't, which brings us to another key point to remember about these systems. For all their benefits,

your OLMS cannot differentiate between a high-quality synthetic oil and a cheap conventional oil.

In these cases, your OLMS may recommend an oil change in your heavy-use pickup after just 5,000 miles (8,000 km) when you know perfectly well the Signature Series in the engine is good for another 10,000 severe-service miles (16,100 km) since we guarantee the oil for up to 15,000 miles (24,100 km)/one year in severe service. The same principle holds for XL Synthetic Motor Oil, which carries a maximum drain interval of up to 12,000 miles (19,300 km)/one year.

Despite the sophistication of oil-life monitoring systems, they have drawbacks. You can rest assured, however, that our synthetic motor oils will deliver excellent protection in your vehicle for the drain interval we recommend, regardless of what the OLMS says. If you elect to extend your drain interval, but your OLMS calls for an oil change before reaching the end of the oil's guaranteed service life, simply reset the OLMS and follow the guidelines we provide on the product label. There's no sense wasting good oil.

AMSOIL Synthetic Small-Engine Oil Delivers Commercial-Grade Protection

Mowers, generators, pumps, compactors and other equipment often operate in hot, dirty conditions that lead to deposits and wear. This can cause reduced engine compression, robbing the engine of power. Over time, equipment becomes less efficient, requires more maintenance and eventually wears out.

Commercial-grade formulation

Most small-engine oils we've tested, however, are nothing more than re-labeled automotive oils, which are formulated with fuel economy in mind, not durability. That won't cut it. Compared to liquid-cooled automotive engines, small engines run hotter; operate under constant load; generate more oil-damaging contaminants; suffer from neglected maintenance; and are exposed to dirt, rain and other extremes. Simply put, they're far tougher on oil than most people think.

AMSOIL Synthetic Small-Engine Oil isn't merely a re-badged automotive oil. Instead, we designed it from the ground up specifically for small-engine dependability. You can rest assured your engines are protected even during periods of extended use when there's no time for scheduled maintenance.

It's made to solve the problems that plague small engines, including wear, power loss, oil consumption, harmful carbon deposits and stuck

rings and valves, helping you get more work done and save money.

Reserve protection

AMSOIL Synthetic Small-Engine Oil is a long-life formulation that has repeatedly demonstrated its ability to safely exceed OEM drain intervals in the toughest conditions. Extensive severe-service testing proves its ability to provide service life of up to 200 hours or the manufacturer's longest recommendation. It provides an extra measure of protection when equipment goes longer between oil changes than is recommended by the OEM.

Applications

Use the appropriate viscosity of AMSOIL Synthetic Small-Engine Oil in small engines found in (not limited to) tractors, lawn and garden equipment, compactors, pumps, light towers, log splitters, welders, cement mixers and trowels, skid-steers, excavators, rototillers and compressors.

- Long service life
- Helps extend engine life
- Inhibits rust

ATVs & UTVs Require a Little Oil to Do a Lot of Work

Like their automotive counterparts, UTVs and ATVs produce more power with each new model year. Manufacturers keep finding ways to increase power per cubic inch by using lighter-weight components, more precise fuel delivery and other innovations.

A typical 900-cc UTV puts out about 80 hp, with some easily eclipsing that number. For example, a Polaris* RZR* 1000, one of the most popular machines available, puts out a whopping 110 hp.

While enthusiasts and homeowners have no trouble finding ways to put all this power to use, sometimes lost in the equation is how little motor oil some of these machines use. Most rely on just 2-2.5 quarts of motor oil to protect against wear, help dissipate heat and keep parts

clean. If the oil isn't up to the challenge, the extreme heat and stress of working hard or riding aggressively can quickly break down the oil and lead to wear and harmful deposits.

Inside the engine, churning parts combined with elevated heat create shearing forces that can tear apart, or shear, the molecular structure of the oil. Additionally, the intense pressure the oil undergoes as it is repeatedly forced through tight clearances, such as the interfaces of the piston ring/cylinder wall and cam lobe/lifter, also causes viscosity loss due to shear. Oil that has sheared out of its intended viscosity range can fail to form a protective lubricating film on critical engine parts, leading to accelerated wear.

Low-quality oil also tends to break down and create harmful deposits when faced with extreme heat and stress. Deposits can cause the rings to stick, reducing engine compression, which results in lost horsepower. Deposits also inhibit heat-transfer and reduce efficiency, eroding the like-new feeling you want when riding.

Differentials are no different

The same principle applies inside the differentials, which are easy to overlook when it comes to maintenance.

Every time you tow a loaded trailer, plow snow or lay into the throttle on a joy ride, all that engine power flows through the differential gears and bearings. The pinion gear can force extreme pressure on the ring gear, which can break the lubricant film and cause metal-to-metal

See page 35 to order.

contact. Heat also increases, which causes the gear lube to break down and fail to provide good protection. Submerging differentials in water also invites water contamination, which reduces the oil's effectiveness. The front differentials on many machines hold only one-third to one-half a quart of gear lube. The same holds for rear differentials that don't share a sump with the transmission.

Given the thousands of dollars you invest in your rig, it pays to use the best lubricants money can buy to ensure your machine stays up and running no matter how hard you push it.

AMSOIL UTV Torture Test

To demonstrate the ability of AMSOIL Synthetic ATV/UTV Oil to protect in the toughest conditions, we installed it in a 2018 Polaris Ranger* and ran it on an engine dyno for 100 hours (4,000 miles [6,437 km]) at wide-open throttle (6,000 rpm). Engine oil temperature reached 280°F (138°C). Afterward, the

engine teardown revealed that AMSOIL Synthetic ATV/UTV Motor Oil maintained viscosity and delivered flawless protection. As the image shows, the oil protected against piston scuffing despite extreme conditions. The piston-skirt coating remained intact, while the piston crown and ring lands demonstrated no abnormal deposits or stress. The piston rings remained free and didn't stick for maximum engine compression and power. For complete results, check out the UTV Torture Test video at youtube.com/amsoilinc. Enter "UTV" in the search.

Next time your UTV or ATV is ready for scheduled maintenance, switch to AMSOIL synthetic ATV/UTV lubricants to ensure superior protection and performance for your expensive machine. We offer a full line of products for whatever make or model you own.

"AMSOIL products are the best on the market and definitely give us an added performance factor."

Bryce Menzies
Professional Off-Road Driver

The piston skirt contained no scuffing and appears like-new, while the piston crown demonstrated no abnormal deposits following 100 severe-service hours.

A man with a mustache, wearing a blue baseball cap, sunglasses, a grey t-shirt, and black shorts, stands with his hands in his pockets next to a white Volkswagen Beetle. The car is parked in front of a grey garage door. The text "Half-Million-Mile VW* Beetle* Still Running Strong" is overlaid in large white letters.

Half-Million-Mile VW* Beetle* Still Running Strong

Most people can't believe it when Randy Melvin tells them his 2000 Volkswagen Beetle has 500,000 miles (804,700 km) on it. The UPS tractor-trailer driver from Troutman, N.C. commutes 125 miles (201 km) round trip between home and Winston-Salem, N.C. each day. When it came time to purchase a new vehicle back in 1999, he opted for a VW TDI due to its high estimated fuel economy, despite the car's poor reviews.

"If you go back to the *Consumer Reports* reviews on that 2000 Beetle, they're terrible," said Melvin. "My dad said, 'Why are you getting that? The reviews are so bad.'" But Melvin knew a Volkswagen mechanic nearby whom he trusted, and he wanted the fuel-economy benefits of a diesel.

"At the time, the Volkswagen TDI was hard to get a hold of; you had to be in the right place at the right time," said Melvin. After 20 years, the 1.9L turbodiesel five-speed manual still gets 46 mpg.

AMSOIL exclusively since almost day one

After buying the car, the dealership performed the first three oil changes using Castrol.* Then Melvin switched to AMSOIL synthetic diesel oil exclusively and today uses Signature Series 5W-30 Max-Duty Synthetic Diesel Oil.

A shop mechanic and AMSOIL Preferred Customer with whom Melvin worked piqued his interest in AMSOIL products after sharing a testimonial about a truck

driver who'd eclipsed 1 million miles using AMSOIL products.

The car has run excellent all these years. Melvin hasn't performed any engine maintenance, except replacing the alternator, air compressor and routine timing-chain service.

"It's proven to me, especially if you can get a half-million miles with no engine failure whatsoever," he said. "The thing runs just as powerfully as it ever did." Melvin used to have a pre-owned 2001 Volkswagen with the same 1.9L diesel engine. "It only had 192,000 miles (309,000 km), but my 2000 would have run circles around it."

People can't believe it

How do people react to his story? "They just can't believe [the car] has half a million miles on it," said Melvin. "Because I've worked at night the entire 20 years I've owned the car, it sits in the garage mainly in the daytime, so it pretty much looks like a brand-new car."

"I change oil every 10,000 miles (16,000 km), and with conventional oil changing every 3,000 (4,800 km), you're going to spend more money, not counting the labor. To me, it's a no-brainer."

Drive it until it quits

"I've always believed you should drive a car until it quits," said Melvin. "To me, buying a car every two to three years isn't beneficial." With the help of AMSOIL products, it may be a while before Melvin's Beetle quits running. "I just think it's a good product. It's proven to me, and I can tell that to anybody," he said. "I'll probably work until I'm 62, so I hope to put at least another 150,000 miles (241,000 km) on it."

PRODUCT SPOTLIGHT:

AMSOIL ENGINE AND TRANSMISSION FLUSH

WHAT IS IT?

- A detergent-based additive designed to clean deposits and sludge from your engine

WHAT DOES IT DO?

- **Prepares engines and transmissions for new oil** by cleaning harmful sludge and other contaminants left behind by inferior oils or neglect
- **Maximizes fuel economy** by helping remove deposits to ensure parts move efficiently
- **Helps reduce oil consumption** by freeing sticky rings and valves to reduce blow-by and emissions
- **Helps quiet** lifter noise
- **Helps reduce heat** by cleaning deposits that restrict heat-transfer

IS FLUSHING MY ENGINE NECESSARY?

- While it's **not a required step** before switching to AMSOIL synthetic motor oil or transmission fluid, it helps prepare your engine or transmission for new oil. If you've been using AMSOIL synthetic lubricants exclusively, flushing prior to an oil change won't provide as noticeable a benefit as if you've been using a low-quality oil. However, flushing before each oil change **ensures you derive the greatest benefits from the new oil.**

HOW DO I USE IT?

- Flushing your engine is **simple and only takes 10-15 minutes**. Check out our how-to video at youtube.com/user/AMSOILinc. Just search "Flush."

Synthetic Gasoline Motor Oil

Signature Series Fights Wear

AMSOIL Signature Series Synthetic Motor Oil provides **75 percent more engine protection against horsepower loss and wear** than required by a leading industry standard^A, extending the life of vital components like pistons and cams.

^ABased on independent testing in the ASTM D6891 test using 0W-20 as worst-case representation.

AMSOIL Keeps Pistons Cleaner

Even after doubling the length of the industry-standard test, AMSOIL delivered **40% cleaner pistons** than required by the standard.^{FF}

^{FF}Based on independent testing of AMSOIL Signature Series 5W-30 in the Sequence IIH Engine Test (ASTM D8111), required by the ILSAC GF-6 and API SP specifications.

Signature Series Delivers Powerful Protection

AMSOIL delivers powerful protection. How good is it? An independent lab compared AMSOIL synthetic motor oil head-to-head against a leading competitor in a 100,000-mile (160,934-km) test^F. AMSOIL provided far superior wear protection and kept bearings looking like new.

^FTesting conducted in an independent lab using AMSOIL Signature Series 5W-30 Synthetic Motor Oil and a leading synthetic-blend 5W-30 motor oil in Ford F-150 trucks with 3.5L twin-turbo engines.

AMSOIL Resists Viscosity Increase

AMSOIL is barely challenged by the industry-standard testing, demonstrating only a 0.1% viscosity increase. Even when the test length is doubled, AMSOIL **delivered twice the viscosity control** required by the standard.^{GG}

^{GG}Based on independent testing of AMSOIL Signature Series 5W-30 in the Sequence IIH Engine Test (ASTM D8111), required by the ILSAC GF-6 and API SP specifications.

Signature Series Helps Keep Valves Clean

AMSOIL fights volatility^J **38% better** than Mobil 1[®] and **17% better** than Royal Purple[®], helping reduce oil consumption and keep valves clean.

^JBased on independent testing of AMSOIL Signature Series Synthetic 5W-20, Mobil 1[®] Advanced Synthetic 5W-20, Royal Purple[®] High Performance Synthetic 5W-20 in ASTM D5800. Oils purchased Oct.-Nov. 2018.

Signature Series Fights Viscosity Breakdown

AMSOIL fights viscosity breakdown **better than the competition**⁹, providing superior protection of pistons, cams and bearings.

VISCOSITY BREAKDOWN
Represented By % Viscosity Lost In The Kurt Orban Test

⁹Based on independent testing of AMSOIL Signature Series, Schaeffer's Supreme 9000 Full Synthetic, Lucas Synthetic, Valvoline Conventional Daily Protection, Mobil 1 Annual Protection and Pennzoil 5W-30 in the Kurt Orban Test. Oils purchased on 5/3/18.

Signature Series Guards Turbos

Signature Series protects turbochargers **72% better** than required⁹ by the GM dexos1[®] Gen 2 specification.

⁹Based on independent testing of AMSOIL Signature Series 5W-30 in the GM turbo coking test.

Signature Series Protects Against LSPI

AMSOIL synthetic motor oils achieved **100% protection** against LSPI.⁹

⁹Based on zero LSPI events in five consecutive tests of AMSOIL Signature Series, XL and OE 5W-30 Motor Oil in the LSPI engine test required by the GM dexos1[®] Gen 2 specification.

Signature Series Cleans

AMSOIL Signature Series Synthetic Motor Oil has **50% more** detergents⁹ to help keep oil passages clean and promote oil circulation. It provides **90% better protection** against sludge^{9D}.

^{9D}vs. AMSOIL OE Motor Oil
^{9D}Based on independent testing of AMSOIL Signature Series 5W-30 in the ASTM D6593 engine test for oil screen plugging as required by the API SN PLUS specification.

AMSOIL Helps Keep Engines Cleaner

AMSOIL Signature Series is fortified with a heavy treatment of detergent additives, delivering **28 percent more acid-neutralizing power** than Mobil 1[®] and helping engines stay cleaner, longer.¹⁴

¹⁴Based upon independent testing of Mobil 1 Annual Protection Full Synthetic 5W-30 and AMSOIL Signature Series 5W-30 in ASTM D2896. Oils purchased July 2020. *All trademarked names and images are the property of their respective owners and may be registered marks in some countries. “I have been using AMSOIL in particular the XL series for many years. I have 2 vehicles over 500,000 km. Both vehicles are running good. The engine is going to outrun the rusty body!”

– Henry
Alberta

XL Resists Oil Breakdown

XL provides **64% more protection** against oil breakdown^F than required by the GM dexos1® Gen 2 specification.

^FBased on independent testing of AMSOIL XL 5W-30 motor oil in the GMOD engine test required for the GM dexos1 Gen2 specification.

OE Protects Against Wear

OE provides **47 percent more** wear protection.^G

^GBased on independent testing of OE 0W-20 in the Peugeot TU3M Wear Test as required by the dexos1 Gen 2 specification.

XL Synthetic Motor Oil

For enthusiasts who want to do something extra for their vehicle. Engineered for advanced automotive technology, including turbos and direct injection. Boosted formulation delivers more cleaning power and promotes longer engine life. Extra protection that lasts up to 12,000 miles (19,300 km) or 1 year, whichever comes first.

Synthetic Diesel Oil

Keeps Turbos Clean

Signature Series Max-Duty Synthetic Diesel Oil provides protection boosted to the max, delivering up to **60% better turbo cleanliness¹** and withstanding the extra demands you place on the turbo when pulling heavy loads or updating the tune for maximum horsepower.

¹Based on specification standards of CAT C13 2nd Ring Top Land Carbon testing.

AMSOIL Fights Wear

AMSOIL delivers **powerful engine protection**. How good is it? In independent testing compared to a leading brand, AMSOIL provided long-lasting wear protection, **keeping cylinder liners looking like new.**^{DD}

^{DD}Based on independent testing of AMSOIL 5W-30 Signature Series Max-Duty Synthetic Diesel Oil and a leading conventional 15W-40 diesel oil using the Detroit Diesel® DD13 Scuffing test for specification DFS 93K222.

Protects Against Rust

Signature Series Max-Duty Synthetic Diesel Oil provides up to **2X better rust protection.**^K

^KBased on industry standard testing using the NIMMA FC-W Rust Test.

Reduces Oil Consumption

Heavy-Duty Synthetic Diesel Oil provides up to **66% less oil consumption**, while Signature Series Max-Duty Synthetic Diesel Oil provides up to **76% less oil consumption.**^L

^LThan required by the API CK-4 standard in the Caterpillar-1N oil consumption test.

Synthetic Gear Lube

“Whoever invented the easy-pack concept is a genius. Especially for servicing transfer cases and differentials. It lives up to its name. Not only an innovative oil, but innovative packaging as well.”

– **Joey**
Calif.

SEVERE GEAR® Synthetic Gear Lube

Specifically engineered for high-demand applications, including trailer towing, heavy hauling, 4x4 off-road driving, commercial use and racing. Flexible easy-pack helps you access tough-to-reach fill holes and eliminates the need for a pump. **Delivers 20% more cold-temperature protection than required by ASTM D2983.**

Superior Cold-Temperature Protection

AMSOIL Diesel All-In-One provides as much as **32°F (18°C) better protection** against cold-temperature gelling than Howes® Lubricator Diesel Treat.^M Plus raises cetane up to 4 points.

^MBased on independent testing in July 2017 of AMSOIL Diesel All-In-One and Howes Lubricator Diesel Treat using diesel fuel representative of the U.S. marketplace and Howes' recommended treat ratio for above 0°F (-17.8°C).

^yBased upon independent testing of AMSOIL All-In-One obtained Nov. 8, 2018 and Sea Foam Motor Treatment purchased on Oct. 25, 2018 in the ASTM D6079 test.

Diesel Cold Flow¹⁷

Effectively modifies wax crystal formation at low temperatures to depress diesel fuel pour point and improve cold-flow filtration properties. Lowers cold filter-plugging point (CFPP) by up to 40°F (22°C) in ultra-low-sulfur diesel (ULSD).

Extended Filter Life

- AMSOIL Oil Filters designated with product code EA15K are recommended for 15,000 miles (24,100 km) or one year, whichever comes first, in normal or severe service. NOTE: Change oil filter at every oil change.
- AMSOIL Oil Filters designated with product code EAO are recommended for 25,000 miles (40,200 km) or one year, whichever comes first, in normal service or 15,000 miles (24,100 km) or one year, whichever comes first, in severe service. NOTE: Change oil filter at every oil change.
- When AMSOIL Oil Filters are used with a motor oil other than AMSOIL motor oil, the filter should be changed according to the vehicle manufacturer's recommendation.

Oil Filters

AMSOIL Oil Filters rank among the highest efficiency filters available to the auto/light-truck and powersports markets, providing a filtering efficiency of 99 percent at 20 microns. Featuring advanced full-synthetic technology, AMSOIL Oil Filters provide greater efficiency, capacity and durability than cellulose filters, extending engine and filter life and reducing engine wear. Easy-grip coating eases the job of tightening and loosening filters. Call 1-800-777-7094 (Monday-Friday, 7 a.m.- 7 p.m. Central Time) or look up your vehicle at AMSOIL.com to determine the appropriate filter for each application.

EAHD

Heavy-Duty Extended-Life Oil Filters

Provide excellent 99 percent filtering efficiency at 20 microns and high contaminant capacity for heavy-duty on- and off-road diesel and gasoline applications. Provide extended service intervals that coincide with the maximum drain intervals of AMSOIL synthetic engine oils.

See AMSOIL.com or call (715) 399-TECH (Monday-Friday, 8 a.m. - 5 p.m. Central Time) for application information.

EABP

Bypass Filters

High-efficiency bypass filters effectively remove minute dirt particles and soot by working in conjunction with the engine's full-flow filter and capturing contaminants that full-flow filter can't remove.

See AMSOIL.com or call (715) 399-TECH (Monday-Friday, 8 a.m. - 5 p.m. Central Time) for application information.
